

TRANSFORMING YOUR DATA INTO OUTCOMES

DO YOU TRUST YOUR DATA? DO YOUR CLINICIANS?

Clinicians must have direct access to accurate, actionable patient-level data to fully drive quality and outcomes improvement and to engage their patients in the journey.

BETTER DATA DRIVES ENGAGEMENT

- Produce and risk-stratify accurate, provider-specific patient populations
- Generate cohort-specific action lists for quality and patient outreach staff
- Collaborate with patients to improve their health

CAN YOUR DATA HELP IDENTIFY AND MANAGE YOUR MOST AT-RISK PATIENTS?

To effectively manage your populations' health, you need to precisely identify patients with lapses in care or those most at risk for a costly episode and quickly arrange for needed services.

BETTER DATA DRIVES OUTCOMES

- Visually overlay data across multiple diagnoses to analyze comorbidities
- ID cohorts with care lapses and/or at high risk and drill into patient-specific detail
- Create patient scorecards to efficiently address all care gaps

ABOUT FORWARD HEALTH GROUP

Forward Health Group transforms chaotic, disparate data into valuable fuel for identifying and managing high-risk and high-cost patient populations. Our powerful, web-based health data visualization platform, PopulationManager®, helps physicians, case managers and quality staff improve care and financial outcomes. Forward Health Group is the population health technology provider for leading health care organizations and The Guideline Advantage™, an alliance of the American Cancer Society, the American Diabetes Association and the American Heart Association.

THE GUIDELINE
ADVANTAGE™

FORWARD
HEALTH GROUP

PopulationManager is a **HUGE ASSET** to our practice. Its intuitive and graphical interface makes it **INCREDIBLY EASY** for us to quickly identify hypertensive patients needing close monitoring and to manage our high-risk populations.

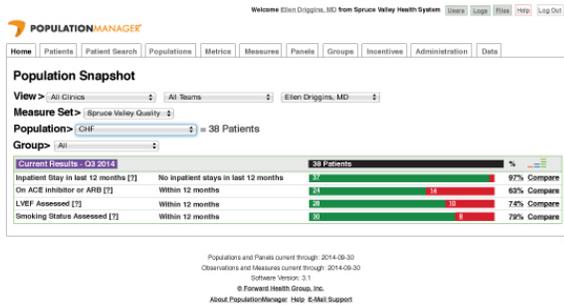

- MIKE RAKOTZ, MD
Northwestern Medical Group

IS YOUR DATA AN ASSET OR A LIABILITY?

Shared-savings. Fee-for-value. ACO. Value-based care. Each new revenue model brings unique demands for quality and performance information. You need to leverage your data for contracting and financial success.

BETTER DATA DRIVES ROI

- Stratify risks and trend outcomes within and across payors and programs
- Manage MOCs, CMEs and other professional development
- Support private and public payor and regulatory reporting needs

IS YOUR DATA GUIDING YOUR PRACTICE FORWARD?

PopulationManager helps your practice transform into a data-driven culture where physicians pursue quality, teams work together, and patients are partners in their care. Accurate and insightful data can deliver improved processes, workflows and accountability.

BETTER DATA DRIVES INNOVATION

- Establish and monitor custom key quality and outcomes measures
- Plot relative performance at the provider, group or payor level
- Customize action planning to improve team efficiency and collaboration
